5.26 A leader, other than the OC, occupying a hex in an enemy ZOC cannot issue orders (4.24, 4.33). However, his Command Range may still be used to designate units to engage in Shock Combat in that segment of the Orders Phase (7.33), so he is not entirely useless. He is not Finished simply because he is in an enemy ZOC; however, he is Finished—and unable to be activated—if any item in 5.15 applies or he has used his Command Range to allow units to engage in Shock, as above.
