6.44 The Wheeling Maneuver: If one-half of a Phalanx unit is in an enemy ZOC, the other half may still move forward, using the Front-to-Flank maneuver (6.43). In addition to the cohesion cost for the Front-to-Flank maneuver, the unit must undergo a TQ check after completing the pivot. If the DR is higher than the unit's TQ, the unit incurs Cohesion Hits equal to the difference, with a minimum of 1 Cohesion Hit, regardless of the DR. If the only enemy unit exerting the ZOC is a Skirmisher, the preceding TQ check is not performed.
