from the moving unit. “Away” means that the withdrawing unit must move into a hex that is further from the moving unit (as measured in hexes) than the hex it leaves. Withdrawal must occur the instant the enemy unit moves into (or starts its move at) 2 hex range (stop moving the enemy unit temporarily), or the option is lost. Phalanxes use their 4 MA if they attempt withdrawal, but their 5 MA when an opposing unit attempts to withdraw.
