7.15 Reaction Facing Change: Any non-Phalanx unit or stack of units may change facing one vertex per Orders Phase when an enemy unit moves adjacent to it from a non-adjacent hex, and this includes any non-ordered movement (8.5, 8.62, 9.11). It may not do so if it is already in the ZOC of another enemy unit. After changing facing, the owning player rolls a die and modifies that DR by the +/– difference between the MA of the moving unit and the MA of the stationary unit. If the DR is higher than the unit's TQ, that unit incurs Cohesion Hits equal to the difference, with a minimum of 1 Cohesion Hit, regardless of the DR. The inactive unit may conduct Entry Reaction Fire (if eligible) after the facing change.
