8.13 A Missile unit may fire at any single enemy target unit which is within its Missile Range and to which it can trace a Line of Sight (8.14) through one of its Front or Flank hexes. Missile units must fire individually; they may not combine fire. If there is more than one combat unit in the target hex, the top unit is affected if fired at through a Front or Flank hex, and to the bottom unit if fired through a Rear hex.
