*The Macedon LC **D** has no target in range for regular Missile Fire, but all Roman units are within 4 hex range for H&D fire. However, **D's** LOS and path to Roman unit W is blocked by two friendly units. **D** does have a clear LOS and path to Roman units **X, Y,** and **Z** (orange arrows). **D's** Missile Fire against any of the targets would be at range 1, with a +1 DRM since the Macedon LC is mounted and is considered moving for H&D fire. Targeting **Z** is advantageous because **D** can trace a path such that only the target unit is able to Reaction Fire. An attack on **X** or **Y** would draw an additional Reaction Fire from **Y** or **Z**. Whichever Roman unit is chosen as the target may use Entry Reaction Fire in response.*
