*Thrace Peltast **C** has no target in range for regular Missile Fire but can use H&D fire from a range of 2 hexes (black arrow). **C** does not have a LOS to Roman unit **X** since the LOS goes down a hexside between blocking/non-blocking hexes. **C** does have a LOS and clear path to Roman unit **Y** so can use H&D fire resolved at range 1. Note the javelinists are not penalized for moving. Both **X** and **Y** may use Entry Reaction Fire at range 1 against the H&D fire, but the fire is considered simultaneous as opposed to being resolved first.*
