2. The players then roll a die for each of their units involved that have Cohesion Hits one less than their TQ (TQ minus 1) and are in an enemy ZOC. If the DR is the same or lower than the unit's TQ, remove 1 Cohesion Hit. If greater, the unit routs per 10.21, but Phalanx units use the procedure in 8.47[1] above to determine if they rout or stand.
