Exception: If a two-hex Phalanx unit would rout, the owning player first rolls the die, adding to that DR the number of Cohesion Hits the unit has incurred more than its TQ, and an additional 3 if that unit was an *attacker* in the combat. If the modified result is higher than the unit's TQ, the unit routs per 10.21; otherwise, it stands in place with its Cohesion Hits set equal to its TQ minus 1.
