EXAMPLE #1: [Cannae] A Phalanx unit in 3722/3822 has three Velites units in each of its three frontal hexes (3622/3721/3821). It must attack all defending units (which total their Size) as one unit. If a Celtic Infantry unit was in 3920 and capable of attacking the Roman unit in 3821, the Phalanx would have to engage only the other two Velites. Or, unless the Celts had a Shock marker, they could sit this one out while the phalangites took care of everyone. While the former will produce better results, the latter may be necessary if the Celts are close to their TQ limit in Hits.
