EXAMPLE #2: [Cannae] A Roman Cavalry unit in 2419 moves adjacent to a Balearic Slinger in 2518. Unfortunately for the poor slingers, there is also a Hastati unit in 2618. The Roman player may either combine the cavalry and infantry in the attack if the stationary Hastati receives a Shock marker, or have the cavalry attack (as it must) alone and the adjacent Hastati sit by and watch.
